ARASHAD JYA
Java Full Stack Developer | Full-Stack Development
Noida, Uttar Pradesh | +91-8052214912 | jyaarashad@gmail.com
GitHub | LinkedIn | HackerRank

SUMMARY

Computer Science graduate (2026) and Java Full Stack Developer with hands-on experience building end-to-end web applications (Core Java, Servlets, JSP, JDBC, MySQL) and personally verifying them through functional testing — tracing defects to their source and validating features against requirements. Skilled in Object-Oriented Programming, Data Structures, MVC architecture, and database design, with practical Python automation experience and working knowledge of Spring Boot, Hibernate, and RESTful APIs. Comfortable across the full development lifecycle, from writing and building features to testing, debugging, and version-controlling them — seeking a Java Developer / Software Developer role (with strong QA fundamentals) to apply a builder's understanding of software to both development and quality assurance.

KEY SKILLS

Core Java, Python, SQL, Object-Oriented Programming (OOP), Data Structures, Collections Framework, Exception Handling, Multithreading, Servlets, JSP, JDBC, MVC Architecture, Session Management, HTML, CSS, MySQL, Database Design, Git, GitHub, Full Stack Web Development, Problem Solving, SDLC & STLC Awareness, Functional Testing, Requirement-to-Test-Case Mapping, Defect Identification & Reporting, Bug Life Cycle, Severity & Priority, Regression-Mindset Validation

TECHNICAL SKILLS

Languages & Core	Core Java, Python, SQL, OOP, Data Structures, Collections Framework, Exception Handling, Multithreading
Data Structures & Algorithms	Arrays, Strings, Linked List, Stack, Queue, HashMap, Sorting, Searching
Java Web Technologies	Servlets, JSP, JDBC, MVC Architecture, Session Management
Framework	Spring Boot, Hibernate, RESTful APIs
Database	SQL, MySQL, JDBC
Front-end	HTML, CSS, JavaScript
AI Tools	ChatGPT (structured prompting, responsible AI practices)
Tools & Practices	Git, GitHub, Eclipse, NetBeans, IntelliJ IDEA, VS Code
Testing & QA Foundations	SDLC & STLC Awareness, Functional Testing, Requirement-to-Test-Case Mapping, Defect Identification & Reporting, Bug Life Cycle, Severity & Priority, Regression-Mindset Validation

PROJECTS

JYA Job Portal — Java Full Stack Web Application | github.com/ArashadJya/Jya-Job-Portal
Tech Stack: Core Java, JSP, Servlets, JDBC, MySQL, HTML, CSS, MVC Architecture, Git

- Built and personally verified a full-stack web application across 5 core modules (Job Posting, Job Search, Resume Upload, Profile Management, Application Tracking), functionally testing each module against intended behavior before integration.
- Designed and tested role-based authentication and session management for 2 distinct user types (Job Seekers, Recruiters), checking access control and session boundaries across user roles.
- Validated data integrity across a normalized MySQL schema accessed via JDBC, tracing and resolving data-flow defects between the application layer and database.
- Used Git/GitHub for version control, tracking changes and fixes from initial commit through a deployment-ready build.

Job Boat — Resume-to-Job Matching Tool | github.com/ArashadJya/Job-Boat
Tech Stack: Java, HTML

- Built an automation tool that extracts resume skills and matches them against live job listings, then verified match accuracy by testing the keyword-matching logic against sample resumes and job sets.
- Automated the end-to-end workflow (parsing → matching → report generation) and checked output correctness at each stage before generating the final HTML report.

Bulk Email Sender — Python-Based Email Automation | github.com/ArashadJya/Automation-Sending-Mail
Tech Stack: Python, smtplib, MIME

- Identified the need to send bulk emails individually (instead of a single BCC-based email), giving each recipient a personalized, individually-addressed message.
- Built and validated a Python tool that reads a recipient list and sends individual emails in sequence, checking delivery success for each recipient.

EDUCATION

B.Tech in Computer Science and Engineering
Lucknow Institute of Technology (Dr. A.P.J. Abdul Kalam Technical University) | 2026 | CGPA: 7.7 / 10

CERTIFICATIONS & ACHIEVEMENTS

- ChatGPT for Students Course — The Bharat AI Initiative by HCL GUVI, powered by OpenAI — Issued September 2026 (Certificate ID: 928CX8E19p87P49x8T)
- Advanced Java Certification — Smart Programming — December 2025
- 3-Star SQL Badge on HackerRank

LANGUAGES

English — Professional Proficiency | Hindi — Professional Proficiency
